

# Sustainable Nanotechnology Conference 2015

## Wednesday, 11 March 2015

### **6B Occupational and consumer exposure - Breakout 2 (16:00 - 18:00)**

time	[id] title	presenter
16:00	[95] Comparing workers measured dust exposure with predicted exposures using a NF/FF model, NanoSafer, and the ART exposure assessment tools	KOIVISTO, Antti J.
16:30	[96] Ranges in respirable and inhalable dustiness and dustiness kinetics of nanomaterial powders as determined with the prototype small rotating drum – priority parameters for exposure assessment	JENSEN, Keld A.
17:00	[97] Nanoparticle Surface Activity: Understanding, Measuring and Integrating it into Inhalation Dosimetry	BELLO, Dhimiter
17:30	[7] Assessment of dermal exposure to nano-objects, and their agglomerates and aggregates (NOAA); Results from a pre-normative research project	BROUWER, Derk
