

Sustainable Nanotechnology Conference 2015

Wednesday, 11 March 2015

6A Toxicology and human health risks - Breakout 1 (16:00 - 18:00)

time	[id] title	presenter
16:00	[90] Distribution and Biological Effects of Fullerene C60, Titanium Dioxide and Silver Nanoparticles after Single and Multiple Intra-gastrical Administrations to Rats	HENDRICKSON, Olga D.
16:24	[91] Role of Biological Monitoring in Nano-Safety	BERGAMASCHI, Enrico
16:48	[92] Synergistic TLR4-dependent effects of titanium dioxide nanoparticles and LPS on the activation of murine macrophages	BIANCHI, Massimiliano
17:12	[93] Feasibility of using in vitro toxicity studies for human risk assessment of nanomaterials	CABELLOS, Joan
17:36	[94] The relationship between the biological effects of Titanium Dioxide nanofibers and their aspect ratio	ALLEGRI, Manfredi
