

FIFE Roadmap for 2016

FIFE WORKSHOP
JUNE 1-2, 2015

FIFE Roadmap

2

Hopefully it will be less complicated than getting a Tesla Model S P85D from Chicago to Boston and back in under 48 hours

FIFE Roadmap

3

- Fermilab developing the idea of a Virtual Facility
- all of the resources available to user considered part of the virtual facility (FermiGrid, OSG, NERSC, etc)
- FIFE wants to be flexible enough to provide access to needed resources if the OSG becomes demand limited
 - could possibly be dedicated Cloud, AWS, Google
- most importantly though, we want to meet your immediate needs so we will build a roadmap from your input today, and distribute as a summary of the workshop.
