

The 26th International Workshop on Weak Interactions and Neutrinos  
(WIN2017)

Contribution ID: 126

Type: **Working Group Sessions**

## DM searches at LHC

*Friday, 23 June 2017 11:20 (30 minutes)*

The recent results from the ongoing Large Hadron Collider, various direct and indirect dark matter detection experiments and data from PLANCK satellite observations have introduced considerable constraints on the particle physics model ideas. This talk will address the current status of the surviving particle physics models and their predictions.
