

Measurements of the Higgs boson mass and its spin and CP properties with the ATLAS Detector

Tuesday, 20 June 2017 17:30 (30 minutes)

An overview of the measurements of the Higgs boson mass and its spin and CP properties at ATLAS will be described.

Primary author: Prof. SEKULA, Stephen (Southern Methodist University)

Presenter: Prof. SEKULA, Stephen (Southern Methodist University)

Session Classification: Working Group: Electroweak Interactions

Track Classification: Electroweak Interactions Working Group
