# Grafana Interface

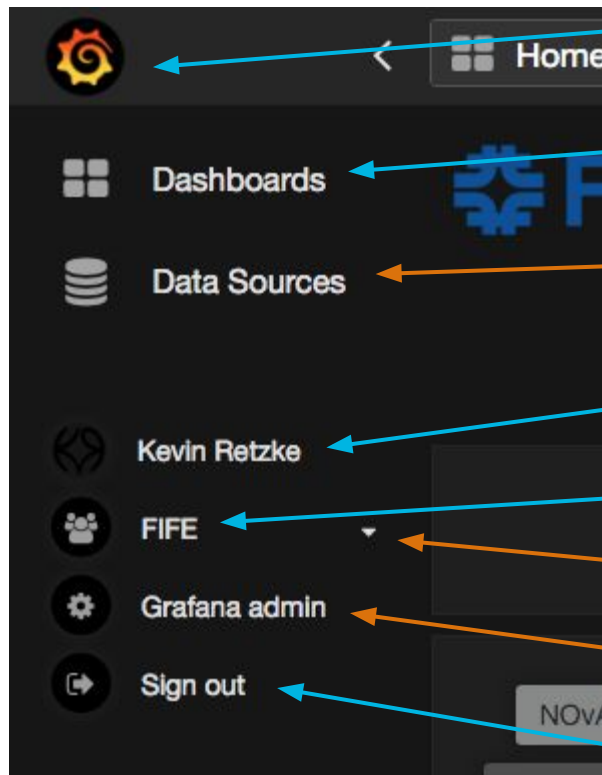

The screenshot shows the Grafana interface for FIFE Batch Monitoring. The top navigation bar includes the Grafana logo, a 'Home' dropdown, a 'Dashboard Tools' button, a 'Time Picker' button, and a 'Zoom Out' button. The main header displays the 'Fermilab' logo, a 'Dashboard List' button, the title 'FIFE Batch Monitoring', and the 'Landscape' logo. Below the header is a 'QUICK LINKS' section with buttons for 'Help', 'About Fifemon', 'FIFE Summary', 'CMS Summary', and 'Experiment Summary'. The main content area is divided into three columns: 'Experiments' (containing buttons for NOvA, Mu2e, MINERvA, MINOS, DUNE, MicroBooNE, DES, and Other), 'For Users' (containing buttons for User Batch Details, Why Isn't My Job Running?, and Why Are My Jobs Held?), and 'Grid Status' (containing buttons for FIFE Onsite Summary, Fifebatch, GPGrid (CE), and GPGrid (Condor)). At the bottom, there is a 'DASHBOARDS' section with 'Main Dashboards' (containing 'About Fifemon') and 'My Dashboards' (containing 'Starred dashboards' and 'Fifebatch Health').

Callouts in the image point to the following elements:

- Grafana Menu**: Points to the Grafana logo in the top left.
- Dashboard Tools**: Points to the gear icon in the top navigation bar.
- Time Picker**: Points to the 'Time Picker' button in the top navigation bar.
- Dashboard List**: Points to the 'Dashboard List' button in the main header.

# Grafana v3.0 Menu

# Grafana v3.0 User Menu

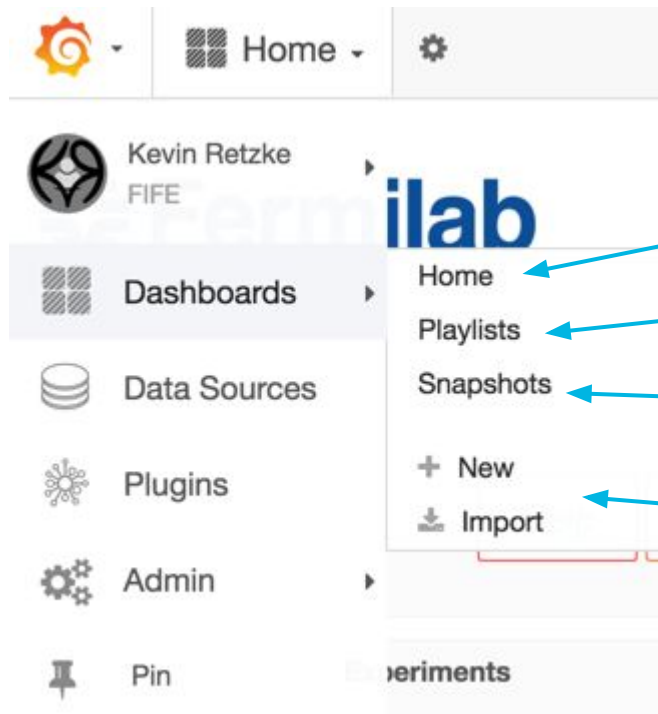

The screenshot shows the Grafana v3.0 User Menu. The left sidebar contains the main navigation items: Kevin Retzke FIFE, Dashboards, Data Sources, Plugins, Admin, and Pin. The right sidebar shows the user menu for Kevin Retzke FIFE, which includes options for Profile, Sign out, Preferences, Users, API Keys, Switch to OPOS, Switch to USDC, Switch to HEP Cloud Facility, Switch to test, and New organization. Callouts point to specific items: 'Personal profile & settings' points to Profile; 'Sign out (NO-OP with SSO!)' points to Sign out; 'Organization Settings (Org. Admin Only)' points to Users; and 'Change current organization' points to Switch to HEP Cloud Facility.

- Personal profile & settings** (points to Profile)
- Sign out (NO-OP with SSO!)** (points to Sign out)
- Organization Settings (Org. Admin Only)** (points to Users)
- Change current organization** (points to Switch to HEP Cloud Facility)

# Grafana Dashboard Use

The screenshot shows the Grafana dashboard interface for 'Experiment Overview'. Annotations highlight the following features:

- Favorite Dashboard:** Indicated by a blue arrow pointing to the star icon in the top toolbar.
- Share Dashboard:** Indicated by a blue arrow pointing to the share icon in the top toolbar.
- Save Changes:** Indicated by an orange arrow pointing to the save icon in the top toolbar.
- Dashboard Settings:** Indicated by an orange arrow pointing to the settings icon in the top toolbar.
- Open Timepicker:** A blue box with an arrow pointing to the time range selection area.
- Refresh:** A blue box with an arrow pointing to the refresh icon in the top right corner.

The dashboard displays three main panels under the 'BATCH' section:

- Job Status:** A stacked area chart showing 'Running' (green) and 'Idle' (yellow) jobs over time. The y-axis ranges from 0 to 10 K. The x-axis shows time from 04:00 to 08:00.
- Job Efficiency:** A stacked area chart showing 'Overall Efficiency' (green) over time. The y-axis ranges from 0% to 100%. The x-axis shows time from 04:00 to 08:00.
- Running Jobs by User:** A stacked area chart showing jobs running by user (sriats1, rnsarehav, ithrmse, lallana, mhairM2) over time. The y-axis ranges from 0 to 8 K. The x-axis shows time from 04:00 to 08:00.

At the top right, there is a 'Quick ranges' section with various time range options:

- Last 7 days
- Last 30 days
- Last 60 days
- Last 90 days
- Last 6 months
- Last 1 year
- Last 2 years
- Last 5 years
- Yesterday
- Day before yesterday
- This day last week
- Previous week

### Starred dashboards

[Fifebatch Health](#)[Fifebatch Slots](#)[Job Cluster Summary](#)[Probe Status](#)

Username: peanut

### How long ago did you submit your jobs?

It can take several hours (up to a day) for jobs to start, the grid is generally running at full capacity. Remember, the batch system is for large-scale computing. If you need immediate results on a small scale you should be using the interactive nodes provided for your experiment.

### What resources did you request?

If you're not sure, you can see these listed on your [User Batch Details](#) page or [Job Cluster Summary](#) in the table below (select your username from the dropdown above). If you didn't request any your job got the defaults. Your job will only start in a slot that has at least your requested resources available; the more you request, the fewer slots that will be available.

### What is your usage model?

- DEDICATED or OPPORTUNISTIC: your job will run on GPGrid, and how long your job takes to start is dependent on:
  - how many other jobs are vying for slots on GPGrid (take a look at the [FIFE Onsite Summary](#) dashboard).
  - how much your experiment is using; your experiment has a quota on GPGrid (visible on the [Experiment Overview](#) page), usage over this number is purely opportunistic
  - what resources are available in the remaining slots on GPGrid (see the [Fifebatch Slots](#) dashboard)
- OFFSITE: your job will run on the OSG, where availability is opportunistic and highly variable (with some exceptions, e.g. FZU for NOvA).
  - Did you request any specific sites? Some sites have restrictions on resources, runtime, or experiments (see the [FIFE wiki](#) for details)
  - take a look at the [Fifebatch Slots](#) dashboard to see where we are currently getting slots

Hey, there are some Glideins on GPGrid that could run a job needing 5GB memory! Maybe I should submit there instead.

Disk and Memory requests look good, lots of users exceeding request time though.

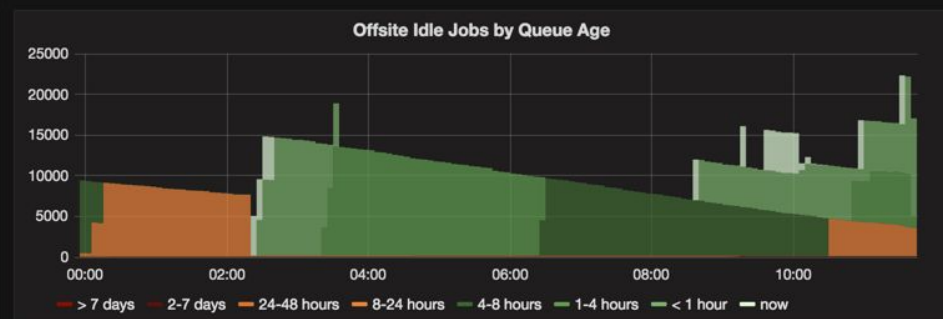

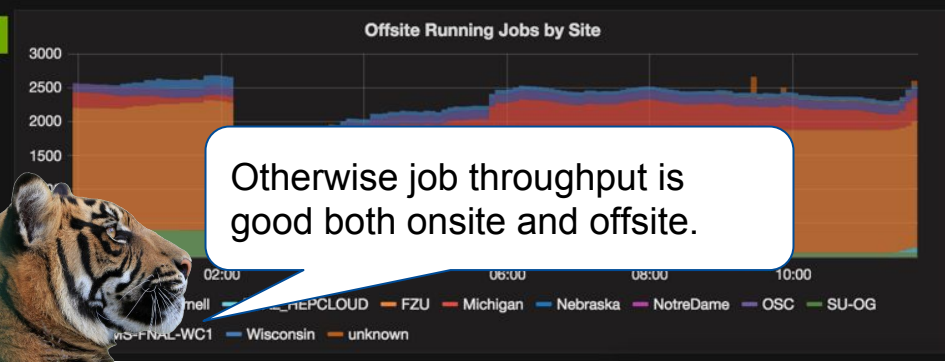

Memory Usage

Disk Usage

Otherwise job throughput is good both onsite and offsite.

Grid utilization is OK.

## GROUP UTILIZATION

## PAGE HELP

## Are there FIFE jobs requesting onsite resources?

If jobs are requesting only OFFSITE, they will not run on GPGGrid, unless they come back through the OSG opportunistic gatekeeper.

See also:

[FIFE Onsite Summary](#)[Fifebatch - Onsite](#)

## Idle Fifebatch Jobs Requesting Dedicated or Opportunistic (Onsite)

## Are the remaining resources in the Glideins "unusable"?

If there are lots of multicore or high-memory (>2 GB) jobs running there will be unusable resources left in the glideins.

See also:

[Grid Utilization \(GPGGrid CE\)](#)[Fifebatch Slots \(GPGGrid\)](#)

## GPGGrid Glidein CPU Usage

## Are the remaining resources in the Glideins "unusable"?

"Unusable" above the line means that the resources are not available for new job resource requests. Resources are only available for new job resource requests within the limits of the resources requested by the jobs running on the resources.
